H A R D T O P H O I S T S

TRIUMPH STAG ADDENDUM

The cradle for the Triumph Stag differs slightly from the cradles for other models in that the swing arms (the arms that swing down and support the weight of the hard top) do not have pads on them but, instead, have brackets which locate onto the pins immediately in front of the rear side windows. Please see the following photos. It may be necessary to lift the hardtop slightly to get the bracket located onto the pins.
